## DOUBLE DEGREE PROGRAMME IN ENVIRONMENTAL ENGINEERING

**Double your degree! By extending your studies abroad at Xamk, you gain important experience, but also get a second diploma valuable in the work market.**

The double degree programme, Bachelor in environmental engineering, is for the future professionals who master both environmental technology applications and environmental management. The programme gives the student versatile knowledge in the field of environmental engineering and prepares for a working career in the public or private sector.

When you have studied three years at your home university, the fourth year will be carried out in Mikkeli. Your previous studies are accepted as part of the degree and when graduating from the South-Eastern Finland University of Applied Sciences, you are awarded the Bachelor of Engineering degree. A personal study plan is prepared in the starting phase of the studies. Please be aware that the exact study time and credits you should complete

depend on the stage and level of your previous studies and work experience.

**Obtained degree:** Bachelor of Engineering

**Extent of degree:** 90/240 credits (ECTS)

**Duration of studies:** 1–1,5 years

**Language of instruction:** English

**Possible working tasks**

- planning and organising environmental matters
- developing and using environmental technical solutions
- environmental consulting

The programme is carried out as follows: You will study in the South-Eastern Finland University of Applied Sciences,

South-Eastern Finland  
University of Applied Sciences

Mikkeli campus for two semesters (August-May or January-December). You will complete the compulsory professional studies (45 ECTS), a Bachelor degree thesis (15 ECTS) and practical training (30 ECTS) in Finland or in your home country. Practical training can also be carried out before the studies in Mikkeli. The acceptance is possible against proven documents.

Studies are carried out in English. There is a tuition fee with a scholarship scheme for students outside the EU/EEA countries. The fee is 1500 euros for one academic year.

See [www.xamk.fi/tuition-fees](http://www.xamk.fi/tuition-fees) for more information.

### THE DOUBLE DEGREE PROGRAMME CONSISTS OF THE FOLLOWING TOPICS:

- environmental sciences
- environmental protection in industry
- environmental, health and safety management
- monitoring and modeling techniques
- energy
- sustainable environmental technology
- bioeconomy
- green engineering

### APPLICATION AND STUDENT ADMISSION

The double degree programme is always based on the mutual written agreement between the foreign partner university and South-Eastern Finland University of Applied Sciences, Department of Forestry and Environmental Technology.

The application period is April 1 – May 15 for studies beginning in August and September 15 – November 1 for the studies beginning in January. The application is submitted electronically at [www.xamk.fi/exchange](http://www.xamk.fi/exchange) (Application process). You will also participate in an English language test and get acceptance information during the summer. The study season begins in the end of August.
